

LUCAS BUENO CESARIO

Full Stack Java Developer | Spring Boot · React · Microservices · AWS/GCP · AI-Assisted Development

LinkedIn: linkedin.com/in/lucasbc92 | **GitHub:** github.com/lucasbc92 | **Email:** lbc92@hotmail.com

ABOUT

Full Stack Java Developer with 6.5 years of experience; since 2022 I've focused on back-end with Spring Boot and full-stack with React and Angular (JS/TS), designing and delivering microservices and monolithic architectures across SQL and NoSQL databases and cloud platforms (AWS — EC2, S3, RDS —, GCP and Azure). I embrace AI-assisted development with Spec Driven Development and AI agents such as Cursor and Claude Code.

HARD SKILLS

- **Measurable impact:** financial microservices processing millions of daily transactions at Magalu; churn prediction tool (Machine Learning) that reduced churn at PariPassu by 18%; automation that cut Magalu's invoice processing time by 60%; and 90–100% test coverage for critical services.
- **AI-assisted development:** Spec Driven Development with AI agents (Cursor, Claude Code), applying brainstorming, plan-writing, and plan-execution workflows to increase delivery predictability and quality.
- **Domain coverage:** loyalty programs (Vivo Valoriza), financial systems (InvoiceCon; tax reform), agribusiness (food quality inspection), and public safety (web monitoring).

SOFT SKILLS

- **Problem Solving Under Pressure:** rotating N3 support and "firefighter of the week" roles, resolving critical incidents to maintain production system stability
- **Adaptability:** effective transition across technologies and domains; quick adoption of new tools into the workflow, including AI agents
- **Fast Learning and Proactivity:** accelerated mastery of new stacks and anticipation of problems
- **Teamwork and Communication:** agile collaboration, mentoring peers, and active documentation

PROFESSIONAL EXPERIENCE

Full Stack Java Developer

Zukk Tecnologia | *Remote* | Nov 2025 – Present

- Refactored the Vivo Valoriza web administration system (the benefits program within Vivo's app), modernizing a distributed architecture with Java microservices, a BFF (Backend for Frontend) layer in Nest.js, and React micro front-ends.
- Adopted Spec Driven Development with AI agents (Cursor and Claude Code) and the Superpowers plugin, applying brainstorming, plan-writing, and plan-execution workflows to increase delivery predictability and quality.

Stack: Java, Microservices, Nest.js, BFF, React, Micro Front-ends, TypeScript, Spec Driven Development, Cursor, Claude Code, RESTful APIs, Git

Full Stack Java Developer

Cast Group | *Remote* | Aug 2025 – Nov 2025 (3 months)

- Worked on InvoiceCon, an electronic invoicing (NF-e) solution, with Java Spring on the back-end and Angular on the front-end, contributing to the system's migration to the new rules of the Brazilian Tax Reform.

Stack: Java, Spring, Angular, TypeScript, RESTful APIs, SQL, Git

Full Stack Developer

Luizalabs (Magazine Luiza) | *São Paulo, SP* | Jul 2024 – Apr 2025 (10 months)

- Developed financial microservices in Java Spring Boot/MVC with JWT and Keycloak authentication, processing millions of daily transactions, and React/TypeScript interfaces for payment declarations (CPF, CNPJ).
- Acted as "firefighter of the week", resolving N3 support tickets and critical production bugs; achieved 100% code coverage with JUnit, Mockito, and SonarQube.
- Built RESTful APIs with Apigee/API Gateway (OpenAPI) and maintained data pipelines with Python, Apache Spark, and Apache Airflow, including repopulating the data lake from Oracle EBS.

Stack: Java, Spring Boot, Spring MVC, Hibernate, Oracle DB, React, TypeScript, Jest, JWT, Keycloak, Microservices, Docker, Kubernetes, ArgoCD, Grafana, Airflow, Spark, Python, Apigee, GCP, Magalu Cloud

Full Stack Developer

PariPassu | Florianópolis, SC | Aug 2022 – Apr 2024 (1 year and 9 months)

- Architected and developed CLICQ, a food quality inspection system covering the entire supply chain (from producers to retail), with a Spring Boot backend and a React/Redux/TypeScript frontend, plus legacy versions in AngularJS, Angular 8/Ionic, and mobile in React Native.
- Built a churn prediction tool with Machine Learning (Python), accessible via a Discord bot, reducing customer churn by 18%.
- Acted as "firefighter of the week" preventing and fixing bugs with N2 support and Grafana monitoring; maintained automated tests (Jest, Mockito) with 90% coverage.

Stack: Java, Spring Boot, React, Redux, TypeScript, PostgreSQL, AWS (EC2, S3, RDS), React Native, Angular, Ionic, Jenkins, Machine Learning, Jira, jOOQ, Python, Swagger, Grafana

Full Stack Developer

Department of Public Safety | Florianópolis, SC | Oct 2020 – Jul 2022 (1 year and 10 months)

- Developed the Bem-Te-Vi App PWA in React and Leaflet, featuring an interactive map of nearly five thousand security cameras across Santa Catarina, with live viewing and recording downloads for state police officers.
- Maintained legacy public safety systems (Bem-Te-Vi and BRAVO) in PHP with LDAP authentication; integrated Elasticsearch for full-text search and RabbitMQ for asynchronous SMS processing of monitored license-plate events.

Stack: PHP, Laravel, React, JavaScript, Leaflet, PostgreSQL, Elasticsearch, RabbitMQ, LDAP, Selenium, REST APIs, Git, PWA

Junior Full Stack Developer

Canal Telecom | São José, SC | Feb 2018 – Nov 2018 (10 months)

- Developed reporting interfaces in PHP/JavaScript and automated tariff calculations with SQL triggers in PostgreSQL (-60% in invoice processing time); took part in a NoSQL migration from SQL to MongoDB.

Stack: PHP, PostgreSQL, MySQL, MongoDB, JavaScript, Linux, Zend, SVN

EDUCATION

Bachelor's Degree in Computer Science

Universidade Federal de Santa Catarina (UFSC) | Jan 2011 – Dez / Dec 2026 (*em andamento / in progress*)

Relevant courses: Database Architecture, Object-Oriented Programming, Data Structures and Algorithms, Software Engineering, Computer Networks, Formal Languages, Distributed/Operating Systems, Artificial Intelligence, Computer Graphics

- Academic project "Polyglot Import CSV": a tool to import data from CSV into multiple databases via JSON configuration, built with Python, Docker, PostgreSQL, MongoDB, Cassandra, Redis, and Neo4J. Academic research on data importation in polyglot-persistence environments.

CERTIFICATIONS

DEVinHouse — Desenvolvedor Full Stack React e Java (SENAI/SC, 2022)

900-hour Full Stack program — SENAI/SC.

HTML5, CSS3, JavaScript, React, Redux, Jest/RTL, Java, Spring Boot/MVC/Security, JPA/Hibernate, TDD/JUnit, Docker, CI/CD, AWS, RabbitMQ, REST APIs, JWT.

PUC/RS (2023)

Professional, Emotional, and Technological Skills for Times of Change — PUC/RS.

LANGUAGES
